This correction sheet may be freely reproduced and distributed in order to maintain the utility and currency of the underlying Standard. This correction sheet may not be sold, licensed or otherwise distributed for any commercial purposes whatsoever. The content of this correction sheet may not be modified.

The following correction should be made:

Page 7: At the top of the page, the paragraph that begins with “and automatic control” should be amended to read as follows:

A decision is required on the extent of functions to be included in the computer based equipment. At one extreme, the computer based equipment may incorporate all aspects of local, centralized, off-site, manual, and automatic control. At the other extreme, the computer based equipment may handle only automatic unit sequences and data acquisition, with all other functions, such as local manual control, handled by non-computer based equipment.
